### **Reasons for Allowance**

Claims 1-12 are allowed for the following reasons:

Independent claim 1 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious a reflector arrangement comprising a second power splitter comprising first, second, third, and fourth ports with the second port serving as an output of the reflector arrangement, and the first, third, and fourth ports being coupled to the second, third, and fourth ports, respectively, of a first power splitter and signals received at each of the first and fourth ports are split into first and second portions for transmission via the second and third ports, respectively, and a signal received at the third port is split into first and second portions for transmission via the first and fourth ports, respectively in combination with the rest of the limitations of the base claim.

Independent claim 7 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious a reflector arrangement comprising and a third multiplexer/demultiplexer comprising a third filter spectral response, a plurality of  $n$  first ports, and a second port, each of the plurality of  $n$  first ports being coupled to the fourth port of a corresponding one of the plurality of  $n$  first 2x2 power splitters, and the second port being coupled to the fourth port of a broadband second power splitter in combination with the rest of the limitations of the base claim.

Claims 2-6 and 12 depend upon claim 1 and therefore they are also allowed.

Claims 8-11 are allowed for the reasons stated in the previous office action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 6,614,573 to Cao et al. teach four port power dividers cascaded together.
